## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The Information Disclosure Statement filed on 2/8/02, paper no. 8 has been reviewed and placed of record. The initialed copy is attached herewith.

### ***Specification***

2. The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

### ***Priority***

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by either Technical Digest or Ouyou Butsuri (both cited by Applicant).

Technical Digest, 1999 International Electron Devices Meeting Technical Digest, pages 389-392. Ouyou Butsuri, Vol. 68, No. 7 (1999). Pages 787-792.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ferry et al. (6,150,798) in view of Technical Digest.

Ferry et al. disclose the claimed invention in figures 3 except for the use of a GaN compound as a switching device. The Technical Digest of the 1999 International Electron Device Meeting teaches the use of GaN compound as a switching device. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide the GaN compound as taught by the Technical Digest as a switching device in Ferry et al. voltage regulator in order to achieve the desired properties of fast turn-on, optimal "on" drive with IB accurately and stably proportional voltages over a range of operating temperature.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Carsten discloses an apparatus and method for control and driving BJT used as controlled rectifier.
